Economic crisis is forced that international buyers must minimize their logistics cost. Europe service and china price is needed now, We found that the workable way will be distribute cargo nearby products locations. Usually, buyers intend to choose Hongkong as distribution center if vendor in china. but where is very expensive as labor shortage.since china have set up Free Trade one. which make international distribution is more convenient here. that's why provide this service for our customer.

Evershine owned high security warehouse in Shenzhen city urban. which is Evershine distribution center . Specialized in electronic and electrical cargo with high value, focus on small shptments (1kgs~1000kgs), Our distribution center is very convenient, as it's within 30 minutes of radius of car to all industrial park of Shenzhen.

We provide warehousing store, labeling, packing and re-packing, pick up and delivery within china, pallet building, document replace and change, document issuing , project service etc.

Professional warehousing management by safeguard and modern warehouse in/out system, CCTV and video camera available.

Warehouse staff from can speak English fluently ,which can accept personal visit to our warehouse or by your own distribution
